A Clear View on Service

At Botla Glass & Aluminium we believe in maintaining the highest standards when it comes to products and services. With over 16 years of experience we can give professional advice when you want to add value to your home.

As we manufacture and install our own Aluminium windows, doors and shopfronts, we are completely involved in our projects from start to finish. This also gives you the chance to have your windows and doors custom made, to beautifully fit your home.

The Botla Glass & Aluminium team strive to create and transform homes through the installation of our low maintenance aluminium solution.

With our years of exceptional service, Botla Glass & Aluminium is a credited and preferred aluminium window and door supplier for builders and homeowners across Western Cape.

3 Ways our Service make Building or Renovations Easier

1. A flawless finish -With a large range of options available, your imagination can take over. Be bold and innovative. Manufacturing has its benefits, so cut out the middleman.

2. Centrally located - Based in Roodepoort we can easily service multiple areas across the Greater Western Cape.

3. Think Big - We are qualified to handle any job - big or small.

3 Reasons to Choose Aluminium for your Home

Aluminium is becoming an increasingly popular choice for the modern home. Not only are aluminium windows and doors aesthetically pleasing but they have an appealing security factor as well.

Melvin Davids, Owner of Botla Glass & Aluminium Specialists, says aluminium windows and doors are becoming more and more popular for everything from office complexes to cluster units and residential homes.

With 16 years in the aluminium window and door manufacturing and installation business, Melvin shares what makes aluminum the best choice for your home or business.

1. Added Value

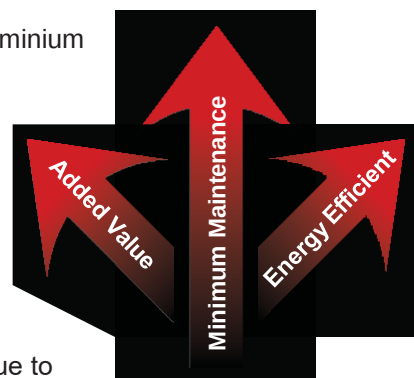

With its ability to instantly update your home or office, aluminium windows and doors add value to your property. Above that, aluminium's unbeatable strength provides an additional layer of security to your windows and doors without compromising style.

2. Minimum Maintenance

Botla Glass & Aluminium's aluminium products are powder coated making them virtually maintenance free. As aluminium does not warp, rot, rust or require painting, your windows and doors will stay in top condition for years to come.

3. Energy Efficient

More strength in less product means aluminium is able to hold more glass with less frame. This lets more natural light into your home, lowering your reliance on electrical lighting. Aluminium is also a recyclable product, making it better for the environment.

Glass Options

Standard as per SAGGA regulations

- 4mm Float

Transform Your Home

Give your home a modern transformation with Botla Glass & Aluminium, Aluminium Windows and Doors

The benefits of Aluminium are rewarding, resistant to weather, unlike to wood and steel, aluminium will not swell, rot, crack or deteriorate, being a lifetime solution.

When making a decision to what the benefits are, replacing your existing frames, Aluminum is the answer as it is significantly less expensive than other framing options, not by only increasing the value of your home, it is economical, energy efficient and can be designed to match your décor with frame finishing available to suit your needs.
